WORK OF CLEARING UP THE MUD  
AND WRECKAGE WILL  
TAKE MONTHS

45 DEAD ARE IN CITY MORGUES,  
AND OTHER VALLEY TOWNS  
REPORT 27

(By United Press)  
Pueblo, June 8.—This city today settled down to a long and hard pull to get from under the mud and misery left in the wake of the mad Arkansas river.

The number of dead stood at forty five bodies in local morgues and reports of twenty-seven dead in valley towns.

Work of clearing up Pueblo will take months, it was said. Railroads have started filling in breaks in the levees which will serve to protect the new tracks being laid. Two relief trains arrived from Denver today and one left for stricken cities of the north. Five hundred cheered the first train to reach the city. Two motor lorries and fifty wagons were to enter today from Fort Houston, Tex., for Pueblo to help restore order and dig the city out of the mud.

More than one hundred horses drowned in the flood were burned on the outskirts of the city.

The comforts of civilization wiped out for several days are restored today with electric lights, water and telephone service and a minimum of domestic gas is available. Several of the flood victims were to be buried today. The services will be simple affairs.

Traffic of refugees to concentration camps built by national guardsmen began last night with removal of many men from the courthouse and schools to the tent city on the south side. The camps will be enlarged gradually to relieve all public institutions as their presence in schools and courthouse, municipal and city buildings has seriously upset the official routine.

APPOINTED BY CONGRESS TO  
MAKE INVESTIGATION

(United Press)  
Francis Edwards, Washington, June 8.—The United States took up the hunt today for the profiteer in agricultural products.

The most important matter before the present commissioner of agriculture created by a resolution effective today was the chasing down of the man who is getting away with the agricultural swag.

A permanent policy for the farming industry is expected to develop with the appointment of a commission of ten created after long conferences between farm organizations and congressional leaders to do away with piecemeal investigation and emergency legislation. The ten congressmen will investigate:

Cause of present conditions in agriculture.

The cause of the difference between prices paid the producer and charges to the consumer.

The comparative condition of other industries.

The relation between farm prices and price of other commodities.

Bank and financial resources and credit affecting agriculture.

Marketing and transportation facilities.

The ten members of the commission will be selected from the house and senate, five by the speaker and five by the vice president and according to present plans will organize immediately.

A sub committee on marketing, finance and transportation and distribution probably will be assigned to investigate the fields.

## EMERGENCY LAW NECESSARY ADMIT DAGO IMMIGRANTS

ARRIVING AT NEW YORK BY THE  
THOUSANDS OR THEY WILL  
DIE LIKE FLIES, SAYS  
COMMISSIONER

(By United Press)  
New York, June 7.—Congress must pass emergency legislation to admit thousands of Italian immigrants in this port or enroute, or "they will die like flies," Fred A. Wallis, New York immigration commissioner said today.

These immigrants were held up here under the new law which restricts immigration to a certain annual percentage of various nationalities already in this country. Wallis declared that because of the crowded condition there is danger of a disease epidemic especially after the immigrants have spent a fortnight or more on their voyage. If they are held a month longer as required by law "the situation will be indescribable."

—Can be Admitted  
Washington, June 7.—The five thousand Italian immigrants held in New York were on high seas before the immigration law became effective and they can be at once admitted under bond and added to the July quota, Chairman Johnson of the immigration committee, said today.

## FEDERAL BOARD WASTING FUNDS BY SHOVELFUL

IS CHARGE CONGRESSMAN ROBINSON MAKES AGAINST VOCATIONAL TRAINING BOARD

(By United Press)  
Herbert Walker, Washington, June 8.—Charges that federal funds are being wasted "by the shovelful" by the federal board for vocational education in its soldier rehabilitation work were made today by Representative Robinson, Kansas republican.

If the present policy is continued the government could give every disabled soldier ten thousand dollars in cash and then more soldiers would get the money than will be rehabilitated by the present board, he said. Under the present practice the rehabilitation bill will exceed one billion dollars, Robinson said, stating that already \$265,000,000 has been appropriated. The congressman said he favored aiding the disabled men but that although \$145,000,000 already had been expended only three thousand men have been rehabilitated—a cost of \$45,000 per man. Overhead expenses of the board are extremely high, he charged, and claimed that in April 1921 the board paid \$9,000,000 to the warring men and \$3,000,000 in salaries.

## NEW LAW HOLDS THOUSANDS OF IMMIGRANTS ON SHIPS

CANNOT LAND BECAUSE QUOTA  
FROM THEIR COUNTRY HAS  
OVERRUN

(United Press)  
Paul R. Mallon, New York, June 8.—Jammed in the holds of twelve ships in the New York harbor today were thousands of immigrants who must live for weeks penned up like cattle defenseless against threatened disease.

Peeble old women from Italy, half clad children from Zecho Slovakia and refugees from hunger stricken central Europe all were kept there. They have been without baths for months and packed in the ships where they must be held because of the new immigration tangle.

Commissioner F. A. Wallis appealed today to authorities in Washington for immediate assistance. He asked that congress pass an amendment to the new immigration law providing for the care of these immigrants.

The congestion has been caused by ship companies who have failed in the race for New York with thousands whom they hoped to push thru before the new law restricting immigration to three per cent of the nation's population of nationalities in the United States went into effect.

With the law only five days old, three nationalities already have overrun their quota. Ships continue to arrive piling up the immigrants unable to return.

## Think Harding Should Decide Between Knox and Porter Resolutions

L. C. MARTIN.  
(United Press Staff Correspondent)  
Washington, June 8.—The suggestion that President Harding end the controversy between the house and senate over the form of the resolution restoring peace with Germany by issuance of an executive proclamation declaring the war ended, is being entertained by some legislative "best minds" who do not relish a possible dickering over the matter in congress.

If Harding without waiting for congress to settle the squabble as to whether the Knox resolution in the senate, or the Porter resolution in the house, is better, would take the matter into his own hands, it would be entirely within his constitutional powers, it was contended. Congress could back him up later, it was pointed out, by adopting a resolution embodying the language of his proclamation.

A young man who formerly lived at Gyrgla met her at the train at her request, because she was unacquainted with Fargo. He accounted for his movements during the evening of the murder.

Guests at the Prescott hotel, who occupied rooms near hers, said they heard no struggle. The girl had been bound and gagged, assaulted, and murdered.

## SUNDAY SCHOOL HAS A PICNIC

Over Sixty Members and Friends of St. Paul's Episcopal Sunday School at Lum Park

### CARS CARRIED PICNICERS THERE

After Dinner a Program of Sports Was Carried Out Under Direction of Walter Griggs

In spite of threatening weather, over sixty members and friends gathered at Lum Park on the occasion of the annual picnic of St. Paul's Episcopal Sunday school.

Sufficient cars were on hand to carry the picnicers, who assembled at the church and at Guin's corner on N. E. Third Ave., and also to take along well filled baskets and packages of eatables which were done full justice by hungry ones after a romp on the beach and in the grove, dinner being charge of the Women's and St. Mary's Guilds of the church.

Following dinner a program of sports was carried out under the direction of Walter Griggs, teacher of the Bible class, and which resulted as follows:

Dash race for older boys, John Evans, first, John Ellison second.

Dash race for younger boys, Malcolm Ellison, 1st, Zane Smith 2nd.

Dash race for older girls, Katherine Stein 1st, Emily Cocks, 2nd.

Dash race for younger girls, Betty Robertson 1st, Nellie Gillette 2nd.

Dash race, little folks, won by George King.

Standing broad jump, won by Ellis King.

Running broad jump won by Dale Sanders.

aBill throwing contest, older boys, won by Dale Sanders.

Ball throwing contest, younger boys, Malcolm Ellison 1st, Warren Golemboske 2nd.

After the sports, a light lunch was served, after which the merry party departed, voting thanks to all who by donations of eatables, use of cars, and other activities had contributed to making the day a success.

It is hoped to have a general church picnic some time in July, on the shores of Gull Lake, of which further notice will be given later.

### N. E. Brainerd Ladies Club Picnic

The Northeast Brainerd Ladies club held its annual picnic last Friday evening at Mr. Crust's cottage South Long Lake.

Those present were Mr. and Mrs. Clarence Forsberg, Mr. and Mrs. Hugh Hudson, Mr. and Mrs. R. W. Crust, Mr. and Mrs. Harold Forsberg, Mr. and Mrs. James Crust, Mr. and Mrs. Oscar Henning, and Mr. and Mrs. A. P. Drogseth.

### CUPBOARD FOR LINEN PIECES

Shelves Should Be Made of Strips of Wood Instead of One Solid Board.

An ideal place for linen is a well ventilated cupboard. In a warm, dry place and in a good light. The shelves should be made of strips of wood instead of one solid piece, so that the air can circulate freely.

Linen will wear longer and more evenly if it is used uniformly. Put the clean linen in the bottom of the pile and use from the top. In this way each piece is used in turn.

It is not economy to store linen for long periods without using it. This applies particularly to starched linen, for the starch rots and discolors it. It is the "best" linen which is most likely to suffer in this way. It should have its turn for family use, and go through the wash occasionally.

A good way to protect the corners of tablecloths, which somehow always suffer in the laundry, is to sew a piece of tape on them; six inches is enough, three on each side of the corner, and the tape is sewn flat to meet exactly the edge of the cloth.

## "LOVE FLOWER" BIG HIT Nine Hundred People Saw the Big Picture Yesterday—Again Today

Manager Workman of the New Park theatre asks the Dispatch editor to thank the people of Brainerd for their appreciation of a superb picture show at popular prices. He says he feels greatly pleased and very proud of the good judgment of Brainerd picture fans, in judging good pictures.

"The Love Flower" is a beautiful picture," he said, "and has not a dull moment, but one must expect as much from the creator of 'The Birth of a Nation'. We had within a few persons, of 900 people see it last night and some said they were coming again tonight.

"We are going to give a lot of big features, and I want people to specially watch for 'Peck's Bad Boy', that great English classic 'The Whip' which are the big pictures to come within a few days. By the way I want to remind the people that we give two matinees for the kiddies on

Friday and Saturday with Jackie Coogan the boy star at a flat price of ten cents. There's a chance for all the youngsters to see Jackie and his great acting dog."

**Poetic Inspiration.**  
At a reception in London a lady questioned Robert Browning, the poet, as to the meaning of a passage in one of his poems that had long been in dispute. "Upon my word," he said, "I don't know what it means. I advise you to ask the Browning society—they'll tell you all about it." Cardinal Newman, in his old age, frankly admitted that he could not remember what he meant when he penned those famous lines in his "Lead, Kindly Light." "And with the morn, those angel faces smile, which I have loved long since and lost awhile."

## AMUSEMENTS

At the Lyceum Theatre Critics everywhere assert that "Pollyanna" is one of the greatest pictureplays ever filmed. The reason for this is that the philosophy upon which the story is based constituted a theme which at the present time has an unusually wide appeal. This production will be the feature at the Lyceum theatre tonight and Thursday.

Undoubtedly Mary Pickford, with characteristic far-sightedness, had this in mind when she chose this celebrated work as her first vehicle for the United Artists' Corporation.

There is a great craving at present time on the part of the public, according to best informed showmen, for something more than mere entertainment. Of course, diversion is always the paramount thing when ever amusement is considered, but at the same time people want something big and compelling something that will drive home a few truths without preaching a sermon or spoiling the flavor of a show which is meant to entertain.

Such a story is "Pollyanna," with its cheerful philosophy of gladness.

My feet would swell when I went to take off my shoes in the evening. I always had a tired and depressed feeling. I tried different remedies with no relief. ## PIONEER ENGINEER DIES

Henry H. Scobie, Old Northern Pacific Employee, Succumbs at Son's Home

(Duluth Herald)  
Henry H. Scobie, aged 70, a resident of Duluth for twenty-nine years and one of the oldest engineers in employ of the Northern Pacific railroad, died suddenly while visiting at the home of his son, F. G. Scobie, 4231 Robinson street. For a number of years Mr. Scobie was one of the engineers on the Northern Pacific passenger train between Duluth and Staples, and ran an engine on that branch before the company ran a train into Duluth over that line.

He was a member of the Brotherhood of Locomotive Engineers, Trinity lodge, No. 282, A. F. & A. M., the Knights Templar and was a member of the class initiated by And Temple Order of the Mystic Shrine, only last Saturday, the night before he died.

He leaves two sons, F. G. and Henry, both of Duluth, and a daughter, Miss Alma Scobie, who has been in California, but is now on her way to Duluth. Funeral arrangements are being deferred pending the arrival of the daughter.

## House Built of Compressed Straw.

A house with walls made of compressed straw was erected in the Faubourg de la Chaussee at Montargis, France. The framework of the building and the sides are filled with blocks of tightly compressed straw, which are claimed to be as hard as concrete and just as unflammable. Owing to the lightness of the materials only small foundations are needed and a house of this kind can be built in a month.

## CHILDREN'S CLINIC HERE JUNE 22-23

To be Given at Brainerd High School Under Auspices Crow Wing County Public Health Ass'n.

## SICK OR WELL CHILDREN

Will be Admitted to Clinic and Given Thorough Examination by the Physicians

(Contributed)

Children's specialists will examine all children under six years of age at the children's clinic which will be given under the auspices of the Crow Wing County Public Health Association at the high school on June 22 and 23 from 9 a. m. till 4 p. m.

These children's specialists are physicians, members of the Northwestern Pediatric society, which is co-operating with the Minnesota Public Health Association to continue the work of the Baby and Infant Welfare Clinics previously conducted by the State Board of Health.

Children either sick or well will be admitted to the clinic and given a thorough examination. The clinics are established for the purpose of keeping well babies well and for discovering slight physical imperfections which, if not corrected in time, might become permanent defects.

The physician in charge examine the babies to determine their condition, advise the mothers about the care and feeding of babies and young children, giving directions in particular cases, but referring all cases in need of medical attention or supervision to the local physicians. Only about 20% of all babies are perfect and during infancy, we are told, is the best time for the correction of their defects. The more common cause of trouble in children under six years of age are improper feeding, poor nutrition, diseased tonsils and adenoids, poor teeth, anemia, and enlarged glands.

No fees are charged. All mothers are cordially invited to be present and to bring children under six years of age. All desiring to attend the clinic please call Miss Michael at the city hall for an appointment. Phone number 816-W.

Baby clinics will also be held at Fort Ripley June 24 and at Cuyuna June 26. Those wishing to make appointments please call Miss Grimes, phone 816-W or write her at the city hall.

## AIDING SOLDIERS IN AGRICULTURE

Vocational Educational Inspector E. D. Ayres Inspects Work of Four in the County

## WERE AT UNIVERSITY FARM

Men are Taught from October to April and Then Spend Time in Actual Farm Work

E. D. Ayres of the federal board of vocational education of soldiers in agricultural lines, was in the city and county to inspect the work of four soldiers who are taking the farming course. The soldiers study from October to April and then take up active farming, in the meantime making reports on work done and being checked up by the inspector. The farm course at the university lasts three years.

Mr. Ayres district takes in the northern part of the state. Four soldiers in vocational work in Crow Wing county are these:

Julius Anderson, Deerwood.

Herbert Rouse, 12 miles south of Brainerd.

Chris Knutson, Pequot.

Peter Homan, Pine River.

The soldiers are engaged in clearing land, raising corn and potatoes, etc. The government will soon have an agent, Allen Metcalf, stationed at Brainerd and Bemidji who will attend to registration of soldiers wishing to engage in farming as their vocational work.

## C. E. Annual Picnic

The C. E.'s of the Peoples Congregational church held their annual picnic at Crust's cottage at South Long lake, Saturday afternoon and evening. A large number of the men were present and took part in the swimming, boating and games which are so enjoyable in such pleasant surroundings.

A bountiful picnic supper was served. In the evening the happy young people gathered around a cheerful fire and joined in singing the numerous songs which Emil Lund played on his mandolin. All had a wonderful time and will look forward eagerly to the next C. E. picnic.

## Remember the Log, JUNE BRIDES

When you sail out from the home harbor for that new home-land just beyond the horizon, leave not behind the log-book you kept so faithfully while your bark was still abuilding.

Keep faithfully the entries day by day that as the months and years roll by you may clearly see the course you have set and KNOW your ship is still sailing dead ahead—nose to the wind.

Keep the log, June Brides, keep the log—that little leather-covered Bank-Book that always grows dearer the older it gets.

## LOCAL MOVIES

To be Taken by the Lyceum Management and Shown at That Theatre

Manager Hiller of the Lyceum theatre who owns and operates his own moving picture camera, is making arrangements to take a series of local movies which are to be snapped each week and shown the following week in the regular news weeklies at the Lyceum. This no doubt will prove a very novel and interesting bit of advertising for both our city and the new Lyceum, as the out of town patrons will get a glimpse of the different sections of the city and its industries that they ordinarily would not see, such as factories, the N. P. shops, our churches, schools and public places.

Any business place who wish their front taken should call Mr. Hiller at the Lyceum and arrange dates. One of the first places to face the Lyceum camera will be the Chamber of Commerce.

Full details will be given out later, and those who want to "get in" these movies should watch the Lyceum's ad in the Dispatch.

## Firefly Illumination.

The firefly is a well-known beetle of the elateridae family, which is able to throw out a strong and apparently phosphorescent light in the dark. The illumination is intermittent, and appears to be under the control of the insect's nervous system. Both the male and the female fireflies emit light, as well as their larvae, the eggs being luminous even while still in the body.

## EASY TERMS

4000 acres of land that have been withheld from the market because of mineral prospects, have now been placed with us exclusively, for sale in 40 and 80 acre tracts, on terms of \$3.00 per acre cash, and small monthly, quarterly, semi-annually or annual payment on the balance.

## LOCATION

These lands are located 2 1/2 to 9 miles from Brainerd and 1 to 3 miles from Nisswa and Hubert. Some are in the vicinity of Gull Lake—others along the river, and all are fairly close to the Scenic Highway and Black Diamond Trail. They are well located for working in Brainerd and living on the land.

## SOIL

The soil ranges from a sandy loam to a clay loam, adapted to clover, potatoes, corn, truck and berries, and prospering settlers near by are demonstrating what can be produced. There is enough timber on some of these tracts to pay for the land—on other tracts the clearing is easy and several acres can soon be broke.

## YOUR OPPORTUNITY

You should not overlook this opportunity to become a land owner and be independent of the shop-whistle and the pay-envelope. The prices and the terms upon which these lands can be bought are equal to those offered several years ago by the State and Railroad Company.

## Consider Your Clothes

HAVE you ever stopped to think of the part petroleum plays in converting raw material into the fabrics which are used to make your suit of clothes? From the wool on a sheep's back to the clothes on your back is a long journey and petroleum shortens it at every step.

By machinery lubricated with petroleum, a man may shear from 175 to 200 fleeces a day. By the old method, 50 fleeces would be considered a big day's work.

After leaving the sheep, the wool passes through ten major processes before it is ready for the tailor. Each of these require the use of intricate machinery, having bearings which run at speeds varying from 350 to 12,000 revolutions per minute.

From the clipper to the last finishing machine, a diversity of mechanical conditions exist, each of which has been studied and experimented with, and a lubricant found which meets exactly the needs of the machinery.

In solving these lubricating problems, and manufacturing oils and greases which enable these machines to perform their work, the Standard Oil Company (Indiana) always has been among the leaders.

Its staff of carefully trained chemists, refiners, and lubricating engineers are constantly at work, devising new and more efficient means of reducing friction.

This Company computes its success not wholly upon its balance sheets, not wholly upon the number of useful products it manufactures, but rather upon the fact that many of the useful products of petroleum are made from material which otherwise would be wasted, and are made by processes which were evolved in the Company's laboratories.

## The Rosicrucians.

The Rosicrucians were members of a mystic secret society which became known to the public early in the Seventeenth century, and was alleged to have been founded by a German noble called Christian Rosenkreuz in 1383. He was said to have died at the age of 106. The Rosicrucians pretended to be able to transmute metals, to prolong life and to know what was passing in distant places. Their secret was never revealed, if there was one to reveal. The society is said to have died out in the Eighteenth century.

## Why some men seem to have all the tire luck —

YOU probably know a man whose car is a hobby with him. He knows just *why* it's the best little old car there *is* of its class.

And he'll stand up for that car against the world in any kind of an argument.

Year by year an increasing number of men feel the *same way about U. S. Tires.*

For a while they may try "job lot" stuff, "bargains," "big discounts" and "rebates."

But usually it doesn't take long for a man to sense the *economy* of the *standard quality* tire.

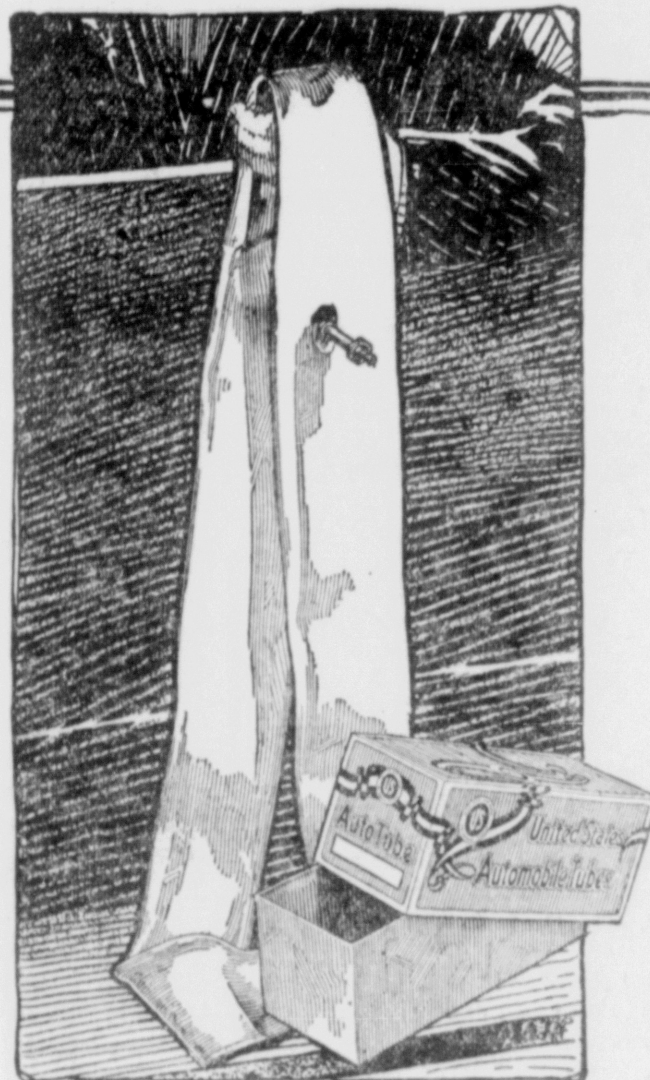

For *years* U. S. Tire makers have been building quality tires for sane tire users—for the car of medium or light weight no less than for the heavy car.

The tire buyers of the land have responded with a mighty *U. S. Tire following.*

The U. S. Tire makers meet the responsibility for supplying this nationwide following with characteristic energy.

Ninety-two U. S. Factory Branches are established, covering the entire country.

Find the U. S. Tire dealer who has the intention of *serving you*. You will know him by his full, completely sized line of *fresh, live* U. S. Tires—*quality first*, and the same choice of size, tread and type as in the biggest cities of the land.

**U. S. TUBES**  
The same standard of quality built into U. S. Tires is put into U. S. Tubes.
